London

Pret A Manger is an international sandwich shop chain based in the United Kingdom, commonly referred to simply as "Pret". Founded in 1983, Pret currently has approximately 500 shops in nine countries.

## The Challenge

Pret A Manger were moving from their Victoria Station office across the to Bressenden Place, to a larger space. They wanted to use the opportunity to analyse and refresh their communications and modernise their facilities.

## The Solution

The client who relies very heavily on having a consistent and reliable internet connection, opted for a diverse ethernet and diverse routing (10Gb circuits) solution, by different tail providers. TwistedPair managed to accommodate this without hesitation. Also, as part of this project, TwistedPair installed 12,000 data points and top spec projection in the Pret A Manger theatre space. Pret A Manger also opted for ongoing support and maintenance under a support contract.

## The Brands

-  Extron Hardware
-  Crestron Control
